

Product Name :
Binocular Stereo Microscope AEI-C

Product Code :
NMCBS130003

Description :

Binocular Stereo Microscope AEI-C Binocular Stereo Microscope a significant advantage of Stereoscopic Microscopic is that by using two optical systems, an erect image of the object can be seen in three dimensions. Magnifications upto 80x are possible by using additional eyepieces. Stereo Microscope are used in every field of Education, Electronics, Watch Industry, Tool Industry, Food Industry, Dissection of Organisms, Medical Science, Quality Control, Inspection & Research Purposes. Observation Head - Binocular head inclined at 45-deg., rotated through 360-deg with adjustable inter-pupillary distance. Focussing - By Rack and Pinion mechanism with adjustable tension collar. Magnification - Standard magnification 20X & 40X or 10x & 30x. Illumination - With integral illuminator, 2 lamps are fitted to provide both transmitted and incident illumination. Objectives - 2 sets of objectives 2X and 4X, selected by rotating nose piece through 90-degrees. Eyepieces - Standard extra wide field eyepieces WF-10X is provided. Binocular Stereo Microscope AEI-C, Binocular Loupes exporters, Binocular Loupes manufacturers

Technical Specification :

Industrial Stereo Microscope is a kind of binocular stereo microscopes, which can magnify micro objects continually and show clear stereo up-right picture. It can be used for observation studies in medical and health, farming and forestry, as well as public security departments, school, and scientific research institutes, and is also used for inspections, assembling and repair of tiny precision spare parts in electronics and precision machine industries.
