Suriname (Paramaribo)

Technical Specification :

Trial frames are an ophthalmic computing instrument used by hospital ophthalmologists and opticians to check people's refractive conditions: hyperopia, nearsightedness, presbyopia, astigmatism, or color blindness.

Metal Rim: This optical lens set features metal rim, which is suitable for MRI or environments that require non-magnetic materials/equipment.

Large Aperture: With a 36mm transparent aperture, the axis marks of the cylinder lens and prism are engraved directly on the lens surface, and the axial position does not change.

Widen Slot Design: The trial lens storage slot is widened for easy removal or insertion of lenses. The standard optical lens slot effectively protects the lens.

Aluminum Case: The trial lens case is manufactured by high-quality aluminum, hard texture, combination lock, easy to carry and worry-free.

Hospital Trial Lens Set - Trial Lens Set 232 piece reduced aperture Trial Lens Set comes in a Leather case with a removable Lens tray, Lenses have Plastic Rims with Powers marked on one side. Hospital Trial Lens Set, Ophthalmic Equipments Exporters, Ophthalmic Equipments Manufacturers
