

Product Name :
Air Compressor Nebulizer**Product Code :**
NMDIG10103**Description :**

Air Compressor Nebulizer This equipment sprays liquid medication to fog panel by compressing air, and forms tiny particles, which flow into the throat through imbibing tube. It adopts low noise, oil-free-high-efficiency valve with no need for daily lubrication forms. It is an ideal product for family and medical unit's use

Technical Data
Maximum compressor pressure : ? 0.15Mpa Compressor free air flow : ? 10L/min Maximum nebulization rate : ? 0.20ml/min Sound level : ? 65db(A)
