

Product Name :
Tray Drier - Industrial Oven**Product Code :**
NMCBS11075**Description :**

Tray Drier - Industrial Oven Being the industry leader we offer Tray Dries/ Industrial Oven which are duly designed for aeration of agricultural products, powders, plastic granules, powders, pharmaceutical chemicals. They are fabricated from fine quality raw material procured from our consistent sources. Our durable Tray dries or Industrial oven are mostly used in clinics, research centres, hospitals and many other foundations or organisations. The various features of tray dries are: Construction: Double walled constructed exteriors which are made of substantial gauge CRCA sheets and stainless steel AISI 304(STD model) interiors. With yarn filling fibreglass, these doors have smooth moving hinges with sealing silicone gaskets feature which is appropriate for locking. Heaters: The cambers are equipped with Tabular Heaters which supply maximum heat transfer. Air Circulation: These cabins are designed in such a way that appropriate air circulation should be there. A recirculation blower contains blower competence that depends upon the model and size of the dryer. Temperature Range: The temperature range of these cabins ranges between 50°C to 150°C/250°C. Damper: Cabins are equipped with adjustable exhaust dampers which are used for pre-filtration of air.
